Shared Prosperity Dignified Life

ARAB HIGH-LEVEL FORUM on WSIS and 2030 AGENDA for Sustainable Development

## Digital Research and Education Infrastructure to Support Science and Achieve the UN-SDGs [Organized by ASREN]

Moderator

**Mr. Yousef Torman**  
Managing Director, for the Arab States, Research and Education Network, (ASREN)

Speakers

**Mr. Fahem Alnuaimi**  
Chief Executive Officer  
Ankabut - UAE

**Mr. Mohamed Al Hajri,**  
Infrastructure Manager,  
OMREN, Oman

**Mr. Raed Al Zoubi**  
Library Director, Jordan  
University of Science & Technology, Jordan

**Mr. Yousif Asfour**  
Chief Innovation and Transformation Officer (CITO), AUB, Lebanon

**Ms. Farida Fassi**  
Professor, Mohammed V University, Morocco

**Mr. Eriko Porto**  
IT Consultant ASREN, Brazil

# Key Facts

- Many Arab countries do not have a **National Research and Education Network (NREN)**. There is a need to establish **NREN** in these countries and should be associated with governance and sustainability plans with actions.
- Existing **NRENs** also need to be supported and to be provided with the required capacities, capabilities, and funding to achieve their objectives.
- At the regional level, the Arab regional Research and Education Network, ASREN, also needs to be supported to complete the pan Arab regional infrastructures and to provide advanced connectivity, applications, services, and collaboration tools.
- All NRENs and RRENs in the Arab region should take the responsibility associated with the new role related “Science Collaboration” through supporting “Open Science,” “Open Access” and collaborating with national, regional, and global initiatives in this

## The session will discuss the following:

- What are research and education networks and what do they do and why they are critical to development? Will also go through models and practices in deploying these networks.
- Services provided by research and education networks and examples of successful networks from the region.
- Examples on engagement with scientists, researchers and academics with research and education networks from the region to demonstrate how they can benefit from these networks, infrastructures, and services.
- Challenges and obstacles facing the developments of these networks and associated infrastructures and services.
- The future role of research and education networks under the new global challenges, especially the UN-ADGs

# What are Research & Education Networks?

- Research & Education networks are **non-commercial dedicated** networks connecting the Universities, Schools, Research Centers, Hospitals, Museums and any other institution that may have research and education activities.
- National Research and Education Networks (**NRENs**) are established to provide connectivity and communications services for the research and education communities at the **national level**
- Regional Research and Education Networks (**RRENs**) are connecting the NRENs to provide connectivity and services to researchers and educators across the borders.
- Altogether are considered as the Global Research and Education Network (**GREN**)

# Main Drivers for Research Networks

- **Technological:** Satisfy high demand *eScience* initiatives, **Multimedia Collaboration**, Distributed High Performance Computing (**HPC, GRIDs**) for **Earth Sciences, High Energy Physics** (CERN, LHC...), **Bioinformatics, Computational Chemistry, Radio-astronomy, Engineering Planning** (computations, emulations & simulations), **Cultural** (archiving, collaborative digital access & processing) ...
- **Social:** Common culture of R&E community, Virtual Organizations VOs, collaborative research, tele-education, Smoothing the Digital Divides, affordable high bandwidth linkage to the Global R&E community
- **Economic:** Demand aggregators: University & school staff, students, researchers. Consolidation & control of diverse public expenditures. Promotion of Information Society (e-Government, e-Business, e-Health). Stimulation of technological & telecom markets → Competitiveness

# Main Objectives for R & E Networks

- Provide scientific research and education institutions with **reliable means of communication** in order to facilitate ease of cooperation and coordination
- Strengthen the notion of **partnership** and encourage joint scientific research among communities.
- **Minimize cost of research** by using diversified academic and technical resources to be made available for use on the network with no need for duplicating investment.
- The fact that students, teaching staff, and researchers use such dedicated networks would eventually **uplift efficiency and productivity** and would boost the concept of creativity and innovation.

# Challenges

- Inadequate funding for NRENs activities
- Unfavorable local and regional policy environment
- Perceived as competitors to ISPs
- Monopoly of telecommunication operators
- Insufficient government support in many cases
- High cost of connectivity

Arab States Research and Education Network (ASREN), is a legal non for profit organization with Arab NRENs as shareholders for promoting world-class Pan-Arab e-Infrastructures and E-services for the R&E communities to boost Scientific Research and regional Cooperation

- **Vision:** Pan-Arab collaborative research and education projects and activities, contribute to boost the scientific research, innovation and education levels in the Arab countries by uplifting efficiency and productivity of research and education communities.
- **Mission:** To implement, manage and extend sustainable Pan-Arab e-Infrastructures dedicated for the Research and Education communities and to boost scientific research and cooperation in member countries through the provision of world-class e-Infrastructures and e-services.

# ASREN Objectives

- **Build, maintain and consolidate regional e-Infrastructures dedicated to e-Science and education across the Arab countries:**
  - Developing, managing and operating a regional network that interconnects the NRENs of the Arab countries.
  - Promoting harmonization of policies and standards in relevant areas at a regional level.
  - Advocating/lobbying at the regional level amongst decision makers and stakeholders
- **Contribute to creating and sustaining NRENS:**
  - Supporting NRENs to implement leading-edge technological solutions while pursuing cost-effectiveness
  - Favouring exchange of expertise and best practices amongst NRENs' personnel in the region
- **Facilitate collaboration and cooperation among researchers and academics:**
  - Increasing availability and accessibility to knowledge resources
  - Promoting development of scientific and cultural content in Arabic
  - Facilitating knowledge exchange and transfer processes across the region and worldwide
  - Promoting the adoption and usage of e-Infrastructures and services among the scientific community
  - Strengthening regional partnerships and encouraging joint scientific research

# Areas of Intervention

- Dedicated Research and Education Networks at national, regional and global levels  
→ Network Management and Monitoring, Network Security, PerfSonar, MANRS. ...
- Research and Education Services  
→ Educational roaming → eduroam, Federated Access through eduGAIN
- Science Cooperation  
→ UN-SDGs through science, Open Science, Open Access, OER, Open Science Platforms, Science Diplomacy
- Community Engagement  
→ Science Communities and Communities of Practice, R&E Communities, Technical Communities
- Scientific Computing  
→ HPC, Clouds, GRIDs
- Internet Access, Security and Governance

# ASREN's Region is Evolving

SHERN

TechCARE

# Partnering with the World

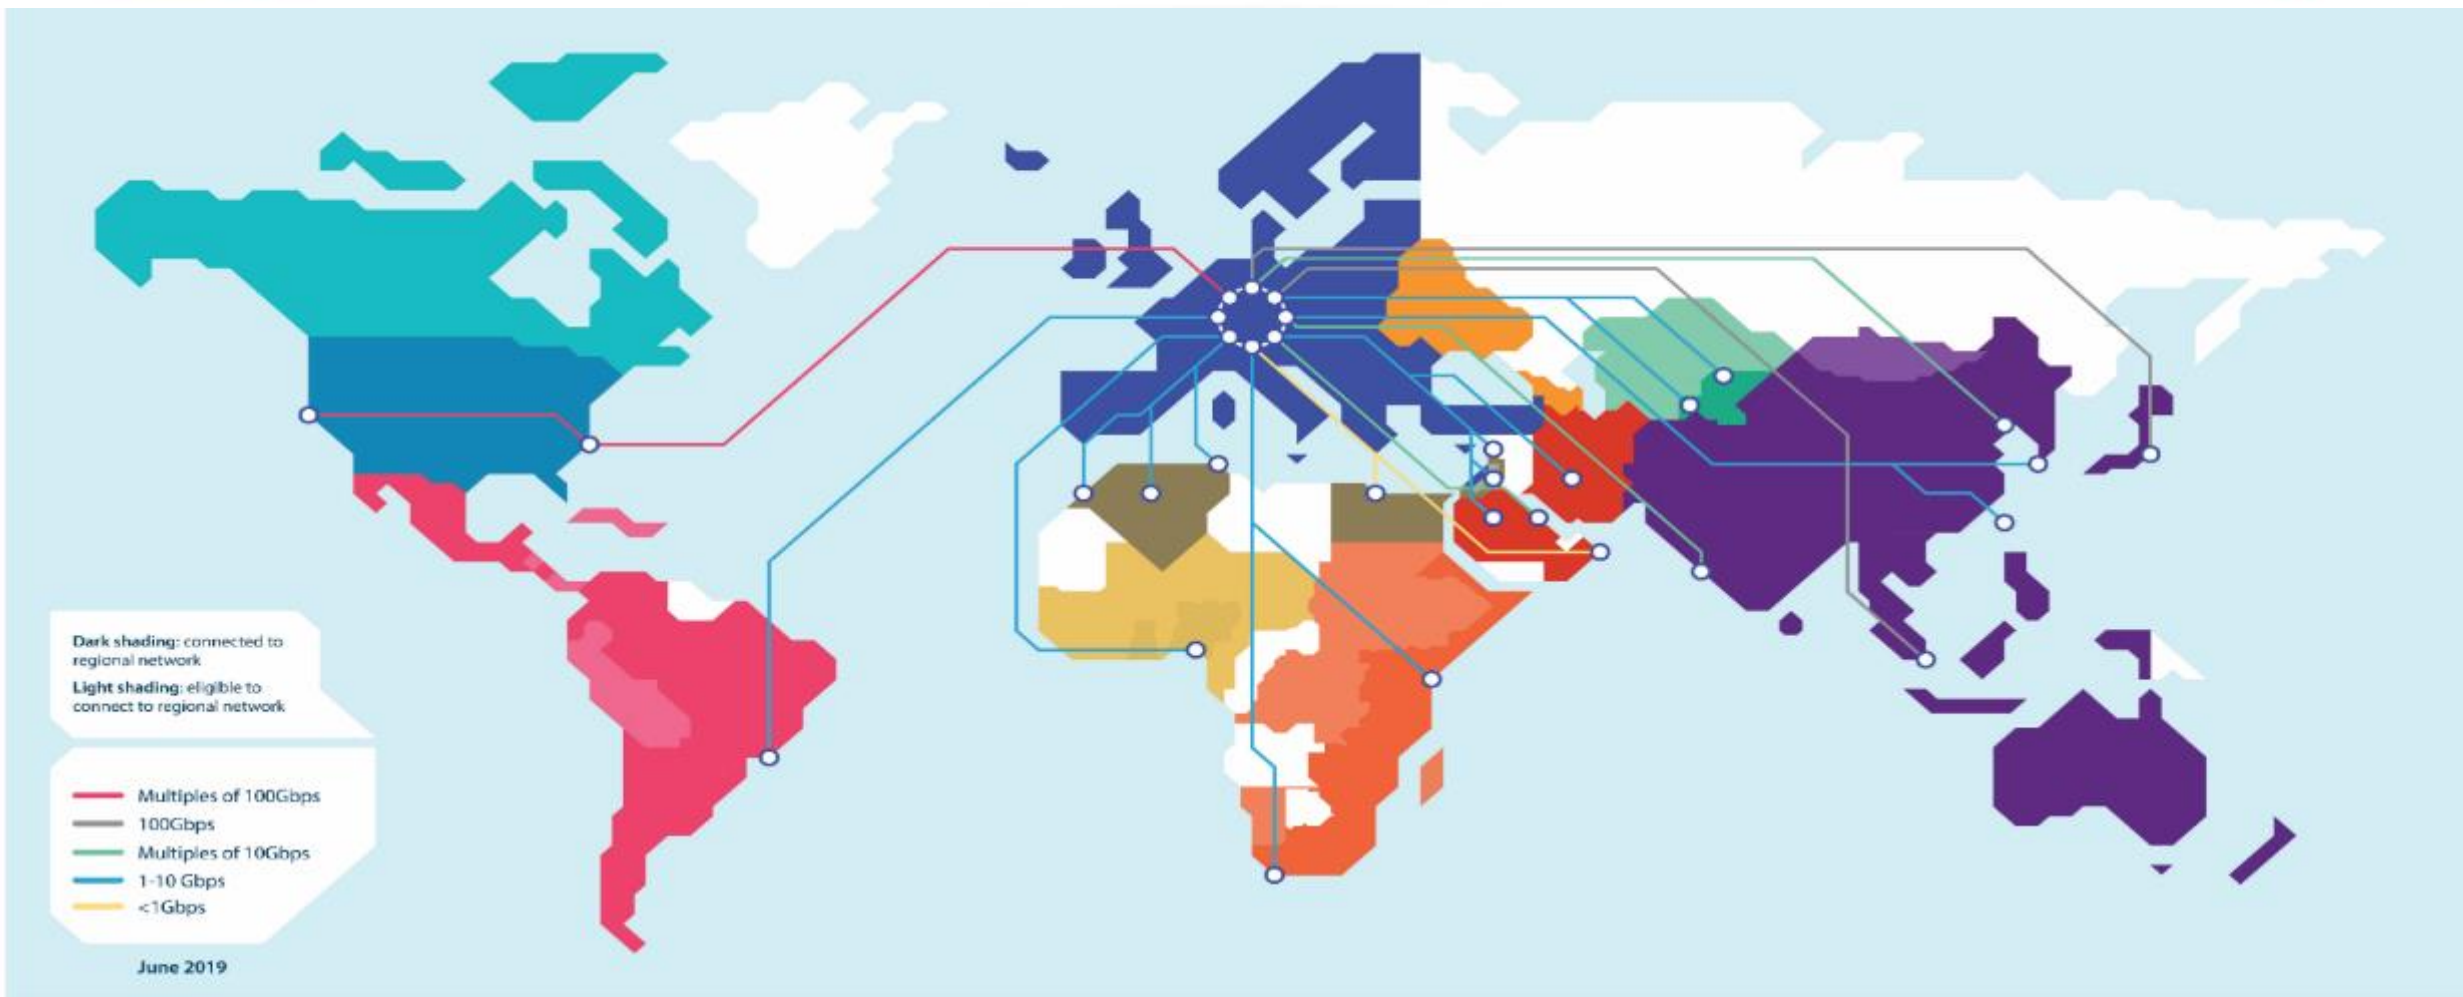

اتحاد الجامعات العربية

# At the Heart of Global Research and Education Networking

## Canada & USA

## Latin America

## Europe

## North Africa & Eastern Mediterranean

## West & Central Africa

## Eastern & Southern Africa

## Central Asia

## Asia-Pacific

## Other R&E Networks

## Observations, Global Trends, Priorities .....

### Climate Actions... Health Care ... Internet Governance...

- UN SDGs → Science, Research, Education, Community Engagement
- Science and Science Diplomacy
- Open Science, Open Access, Open Data....
- Science Communities and Communities of Practice
- Scientific Computing
- Science Collaboration Platforms
- **Internet** Access, Security and **Governance**
- ....

## Achieving UN SDGs through Science and R&E

- Promote and raise awareness of the importance of SDGs to policy makers, students, researchers and academics
- Explore means and tools towards achieving them
- Share/exchange knowledge and activities by NRENs in other countries/regions towards these goals including policies and actions
- Promote Science as an instrument for the development of communities to progress towards the achievement of the UN SDGs

## Open Science, Open Access, OER....

- Take the lead to promote and disseminate UNESCO's recommendations on Open Science in coordination with relevant stakeholders
- Consolidate efforts to promote Open Science through conferences, fora, knowledge hubs, workshops, brainstorming sessions and concept debates.
- Initiate/host/operate services and applications
- Coordinate with similar efforts and activities by other NRENs/RRENs around.
- Disseminate science, open science and collaborative research towards achieving the SDGs and addressing the common needs of the country/region.

## Open Science Platforms, Clouds, Tools...

- Follow national and regional initiatives on adopting Open Science Platforms such as the EOSC Europe.
- Establishing a community of librarians and data specialists across the region following the LIBSENSE project
- Organizing dedicated workshops on open access and open data to promote the culture of “Open Science” at the institutional and technical levels
- Deploying national/regional Open Science Harvesting Platform to integrate national/ institutional repositories

## Science Communities and Communities of Practice

- Identify research communities and promote the creation of research communities and communities of practice at national and regional levels
- Encourage Science Dialogue with researchers and communities of practice.
- Provide these communities with collaboration tools and access to resources around the region and beyond
- Provide mobility services like eduroam, eduGAIN and eduVPN
- Provide capacity building/training to facilitate and optimize the use of ASREN's and NRENS' service offering.
- Encourage the use of open source, open educational resources and MOOCs and build on existing efforts especially those provided by regional and national initiatives.

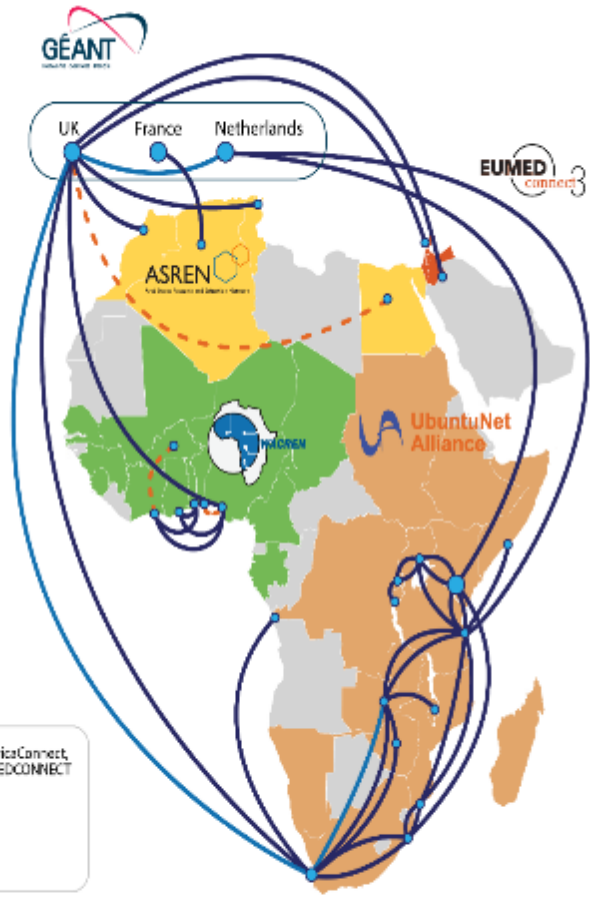

# Connecting the Eastern Mediterranean research and education communities

This project is funded  
by the European Union

- **Start date: 16 November 2019**
- **Duration: 48 months**
- **Funds: European Union Grant Contract**  
**Budget: 37.5M EUR (80% EU co-funding)**
- **Funding for connectivity, equipment and cloud**

# AfricaConnect3 Enables Science Cooperation

1. Providing connectivity between research and education communities
2. Providing mobility services, namely: eduroam, eduGAIN, eduVPN ....
3. Providing clouds infrastructures and services
4. Supporting Open Science through the LIBSENSE project
5. Engagement with research and education communities
  - AfriGEO → African Group on Earth Observation
  - GMES and Africa → Global Monitoring and Environment Security
  - AERAP → African European Radio Astronomy Partnership
  - DEA → Digital Earth Africa
  - ASFAP → African Strategy for Fundamental and Applied Physics
  - Identifying Climate R&E Communities
  - African Synchrotron Community → SESAME

## How AfricaConnect3 Does that?

- **Conferences and workshops**
- **Capacity Building**
- **Study and identify the needs of the communities in terms of connectivity, access, data dissemination and other services**
- **Coordinate with national and regional RENs to connect to the national R&E networks**
- **Support R&E institutions and communities to deploy eduroam and eduGAIN**
- **Promote the deployment of services and access mechanisms**
- **Promote Open Science and Open Science Platforms**
- **Support Women and empowering them to be more engaged in STEM.**

# Specific SDGs

ASREN

4 QUALITY EDUCATION

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

7 AFFORDABLE AND CLEAN ENERGY

Ensure access to affordable, reliable, sustainable, and modern energy for all.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Build resilient infrastructure, promote sustainable industrialization, and foster innovation.

13 CLIMATE ACTION

Take urgent action to combat climate change and its impacts.

14 LIFE BELOW WATER

Conserve and sustainably use the oceans, seas, and marine resources.

15 LIFE ON LAND

Sustainably manage forests, combat desertification, halt and reverse land degradation, halt biodiversity loss.

17 PARTNERSHIPS FOR THE GOALS

Revitalize the global partnership for sustainable development.

# SUSTAINABLE DEVELOPMENT GOALS

# RESEARCH AND EDUCATION NETWORKS IN THE SERVICE OF CLIMATE ACTION

## IGF 2021 Town Hall #45 Exchanging research data responsible to save the planet

Add this session to my schedule

### Session

**Time**

Wednesday, 8th December, 2021 (12:45 UTC) - Wednesday, 8th December, 2021 (13:45 UTC)

**Room**

Ballroom C

Add to Calendar

**Organization's Website**

<https://www.geant.org>

**Theme**

(EMERGING AND CROSS-CUTTING) Inclusive IG ecosystems and digital cooperation

**Subtheme**

Assessing Internet governance approaches and mechanisms and fostering inclusiveness: What are the main strengths and weaknesses of existing Internet governance approaches and mechanisms? What can be done, and by whom, to foster more inclusive Internet governance at the national, regional and international levels?

Advancing global digital cooperation: What opportunities are provided by the current focus on digital cooperation resulting from the UN Secretary-General's Roadmap for digital cooperation? What role should the IGF play (and how) in advancing global digital cooperation?

Community Week **November 16 - 18 2021**

Tue, Nov 16, 2021 - Fri, Nov 19, 2021

### Community Week

Post to Facebook

   

[Register](#)

One of the benefits of becoming a member of the Internet Society comes from being part of a network of people. Every day we help each other solve problems, discover solutions, share stories and cheer each other on as we create a bigger, stronger Internet for everyone. After all, if your people network becomes bigger and stronger, the Internet can become bigger and stronger too!

This community spirit, known to many as the 'Internet way,' is a big part of what makes the Internet itself such a marvel.
