 A Network for Organizing Collaborative Research Management
 E+ project: PS univs, MOHE, EIFL, EU univs
 2021-2024

National Open Access Initiatives in Palestine

ROMOR aims to improve the management, visibility, and accessibility of scientific research outputs in Palestinian HEIs

جامعة بيرزيت
BIRZEIT UNIVERSITY

TU
WIEN

University of Brighton

وزارة التعليم العالي
MINISTRY OF HIGHER EDUCATION
Palestine
AQAC Palestine
Accreditation and Quality Assurance Commission

Challenges of OA publishing in Palestine

- lack of OA awareness
- lack of institutional encouragement to OA (not recognized in assessment for academic promotion)
- general fear of intellectual theft /copyright infringement
- lack of policies and/or mandates for OA publishing or self-archiving
- skepticism about quality/impact
- Arabic language content

ROMOR Main Results (2017-2019)

- **Four searchable and accessible OAIR** of a full-text theses, and academic publications in the partner universities
- **Research Data Management Policies** that are compatible with FAIR and OA needs
- **Vocational and academic training/training material** on OA, IR development and data stewardship for both managerial and academic staff
- **Raised awareness** of other non-partner universities who have competed to have higher ranking in the web metrics ranking of world universities

The way to success

- Business modeling and preparation of OAIR deployment plans
- Setting up OAIRs: challenges, and lessons learned
- Research data management policy development
- Lessons learned from ROMOR
- National/regional roadmap

BMC:

Recommendations

- Create an inventory of your current infrastructure (i.e., hardware, technical solutions, policies, etc.)
- Aim to keep number of potential value propositions to a minimum
- Try to make sure that those who will provide the resource for carrying out activities (i.e., who pays for these) can see a value in doing this such as making internal reporting easier or more efficient
- Do not underestimate the importance of good communication channels and establishing relationships with end users (customers)
- Consider how best to leverage key partnerships – both within your own institution but also with other universities to deliver value

Implementation Roadmap

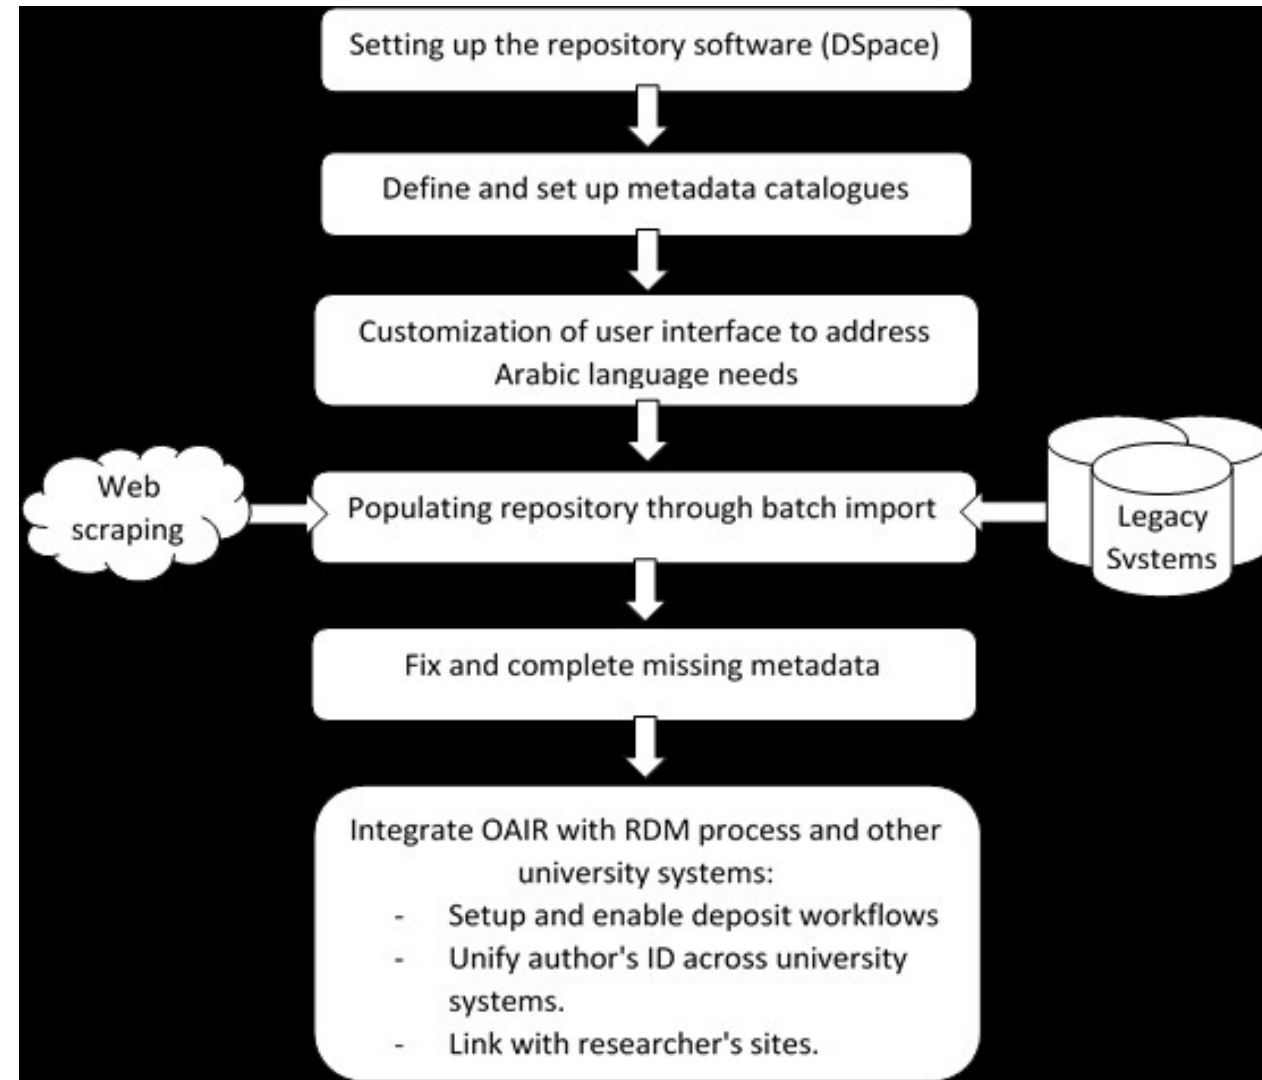

Objective	Actions	Roles & Responsibilities (specify lead and contributors)	Deadline for completing action	Milestones
Identify working team	<ul style="list-style-type: none"> - Identifying stake holders (Academic vice president, Deanship of scientific research, Library, Computer Center, E-Learning Center, Multimedia and Educational resources center). - Meet with the different stakeholders from different university 	Nael (Lead) ROMOR Team (Nael, Basim, Samer, Mutamed, Arafat)	31/12/2017	
Identify Repository Content	Identify types of data (text, AV) contents to be deposited.	Nael (Lead) ROMOR Team, Scientific Research Dean, Academic Vice President, Library	15 March 2018	
Developing repository policies	<ul style="list-style-type: none"> - Write repository policy - Submit to EU partners for review - Refine and Submit Scientific research Committee for Approval - Submit to University senate for Approval 	Academic vice President (Lead) Dean of Scientific Research Library ROMOR Team	31 March 2018	Milestone (Institutional RDM Policy)
Installing and configuring repository software	<ul style="list-style-type: none"> - Prepare Repository Hardware - Review exiting software solutions and identify relevant software based on institutional needs and capacity. - Install the repository software - Configure the repository software 	Nael (Lead) + Eadi + Thaez + Mohammad (CC)	15 May 2018	Milestone (PTUK IR)
Populating the repository	<ul style="list-style-type: none"> - E- Library staff will start populating the Repository with old data. - Meet with Academic stakeholders to explain the potential benefits, their responsibilities and contributions. 	Nael (Lead) + Diana (E-Library)	31 May 2018	Milestone (Populated IR)
Meta Data Descriptions	<ul style="list-style-type: none"> - Adopt Metadata standards 	ROMOR Team + Scientific Research + Library	continuous	

Implementation Roadmap: Recommendations

- Scope pilot implementation before rolling out wider implementation across entire institution
- Provide specific deadline for each activity and include relevant milestones
- Be realistic about time frames associated with each activity
- Be clear about who is involved in carrying out each activity (e.g., IT, Library, Research Office) and where possible, include named staff
- Define metrics relating to each of roadmap activities (i.e., provide targets for content uploads; number of users).

Setting up OAIR

- Setting up DSpace (+, -)
- Define and set up metadata catalogues
- Customization of user interface to address Arabic language needs
- Populating repository through batch import
- Fix and Complete Missing Metadata
- Integrate OAIR with RDM process and other university systems

Setting up OAIRs: Challenges

- **Content localization:** rendering (English and Arabic)
- **Variation of author's names:** author's username (university email) as identifier: most researchers do not have ORCID
- **Missing metadata:** volunteers to fill, machine-learning solutions
- **Populating the repositories:** batch and import
- **Technophobia:** approached personally (volunteer students) and using word-of mouth method, deposit on their behalf until feel confident

Four OAIRs

iugspace.iugaza.edu.ps

fada.birzeit.edu

dspace.qou.edu

scholar.ptuk.edu.ps

Advocacy Events

- Launching ceremonies
- Training activities for librarians and research support staff
- Training activities for researchers/academic staff, and students
- Training materials, dissemination workshops, help videos, RDM policies, brochures, booklets, and terms of interest

RDM Policies Development

- Starting from model policies (training workshops, discussions, and feedback from EU partners)
- Several meetings conducted between ROMOR team and working groups, and stockholders in order to discuss the drafted policies (in Arabic)
- Policies are approved by universities councils and now put into practice
 - Researchers **must submit their research outputs to apply for academic promotions**
 - **Annual assessment of staff members** is performed based on researchers submissions to the repositories
- Number of submissions significantly increased after implementing the policies

Policy Development: Recommendations

- Get **senior management** buy-in from outset when developing or revising policies in relation to the OAIR
- Consult with all relevant stakeholders (e.g., operational units that may need to support services to enable compliance with the policy)
- Consider who will be responsible **for monitoring compliance** with policy and how this will be carried out
- Aim to produce **concise policies** written in **plain native language**
- Consider workflows and institutional infrastructures (hard and soft) that will be required and/or impacted by the policy
- **Test policy out before seeking ratification** (involve researchers as well as operational units)

Impact of ROMOR (Increased Visibility)

	United States	1,528
	Syria	697
	Malaysia	578
	Libya	571

Lessons Learned from ROMOR

- Lack of communication between MoHE and Palestinian universities
- Fragmented environment of OAIRs: costs duplicated, unable to take advantage of collective data about content and users
- Local universities face challenges in developing their OAIRs:
 - skilled personnel (administrative, technical support and security)
 - finance (co-finance 90%, own-investment 10%)
 - power supply
 - adopting internal policies (compliance, OA publishing, copyright issues, quality control)
- Cooperation between MoHE and local universities is essential

Next Step: **ROAD** Project (2021- 2024)

Enables sharing infrastructures collaboratively across individual institutions to promote the research output of partner institutions as a whole, including agreements on metadata standards, services, and policies
